

# History Research Center

A powerful research tool for teaching history and critical thinking

**History Research Center** cultivates information literacy by empowering students to critically assess diverse historical events across thousands of years of U.S. and global history, evaluate varied information types (such as primary sources, videos, maps, and timelines), and conduct strategic, historical research through informed inquiry.

## Why it's great

### Integrated resources

It provides seamless access to U.S. and world history content from six trusted databases.

### Builds research literacy

It helps students evaluate sources, think critically, and conduct effective research.

### Engaging, multimodal content

It features primary sources, videos, timelines, topic centers, slideshows, and more to support diverse learning styles.

...[goes] into great depth...and feature[s] primary sources that are useful and often required for assignments.”

## Teaching and learning tools

### Curriculum Planning Tools

Robust digital learning modules are grounded in instructional design frameworks including comprehension assessments and certifications.

### Organize Your Projects

Find, save, and organize your materials for a project, lesson, or research task.

### Topical Activities

Connect your course objectives and activities to current events. Our editorial team highlights key topics through curated centers, collection highlights, and featured resources.

### Classroom integration

Specific material related to the resource you are viewing is recommended for broader or deeper exploration.
