Infobase

Infobase Learning Cloud

Bite-sized, on-demand modules that build real-world skills for school, work, and life

Infobase Learning Cloud is a flexible solution that builds information literacy and essential skills for success in today's digital world. With hundreds of outcome-based courses across 50+ topic areas—from digital literacy to career development—it supports students, educators, and lifelong learners across schools, libraries, and workplaces.

Why it's great

Flexible learning for real-world success

Coursework builds tech, workplace, and power skills—preparing learners to apply their knowledge in school, work, and life. Institutions can customize content to meet local goals.

Outcome-based course framework

Designed to foster both knowledge and real-world application it helps learners build practical skills they can use right away in school, work, and daily life.

Learn your way, on your time

Offer your users flexible, self-paced learning with on-demand modules and assessments that support mastery and fit into any schedule.

> "**Learning Cloud is easy to navigate and super engaging. The DoIt, ShareIt, and ProveIt features made learning interactive, and I gained valuable insights while exploring other Pathways.**"
>
> - Former MIT Student

Learning and access tools

Courseware Solutions

Robust digital learning modules grounded in instructional design frameworks and including comprehension assessments.

Custom Content Creator

Design your own courses that captivate and educate by integrating Learning Cloud content or your own video, audio, documents and links.

Quiz Builder

Enables instructors and designers to create their own assessment to best match their institutional needs.
