4

Ways You Can Use Infobase Learning Cloud as an Adaptable eLearning Solution for Your Entire Campus Community

1

Unlock unlimited possibilities and leverage existing materials with Custom Course Authoring.

Use content and videos from your subscription or upload video, audio, document, and SCORM and xAPI files to create custom courses for your account.

2

Integrate content into courses with LMS Integration.

Seamless integration with all major LMSs including Canvas, Blackboard, Moodle, D2L/Brightspace, and Schoology. (For example, incorporate bite-size videos from Excel basics into an Accounting 101 course.) Learning Cloud is IMS LTI certified.

3

Validate learning with interactive custom assessments using the Quiz Builder Tool.

Add custom assessments of various types—such as Multiple Choice, True/False, Drag and Drop, or Fill in the Blank—to any course.

4

Target specific communities and build content for any situation with Custom Pathways.

Group together and assign courses for teacher onboarding, compliance training, or transitioning to college.

Upskill and Inspire the Campus of Tomorrow!
